The year was 1969. Neil Armstrong became the first man to walk on the moon. The Beatles recorded their final album. And crashing to Earth aboard a damaged spacecraft was a lone survivor of a dead planet who discovered that the sustenance she needed in order to live flowed not in rivers but in the veins of the humans of this strange new world. A huntress named Vampirella!

In *From the Stars...a Vampiress*, bestselling author Steven A. Roman examines the Warren Publishing adventures of the queen of the bad girls whose reign has lasted through five decades of published comics and novels, and turns a critical eye toward her sole motion picture

appearance, as well as the 1970s movie version that might have been. Combined with an extensive checklist of her Warren Era appearances and rare behind-the-scenes material, *From the Stars* is a smorgasblood of information for Vampirella fans!
